ST-77 Foam Lance Brass- 1.25 + 1L Bottle

Product Description:

The ST77 Foamer features an outlet nozzle that operates in vertical or horizontal positions with a metering valve for chemical mix settings. The differences between this and the ST73 models is that it has a brass fitting instead of stainless steel, it only comes with a 1 litre bottle and is only available with a 1.25 injector. The easy to fill, wide mouth bottle has Fill/Mix markings on the side and grip for easy bottle changing. The **stainless steel** non-corrosive injector nozzle is perfect for a wide range of uses. The Suttner design cuts the chemical consumption by 50% over the competitor's models. The use of foam cuts cleaning time and reduces labour cost. This is the right tool to get the job done easily and efficiently. Perfect for more effective cleaning in industry, agriculture, automotive, fleet, institutional and food processing! This model has a 1.25mm injector and is known as the Brass Suttner, due to its Brass inlet connection

Technical Details:

Inlet: 1/4" Female
Nozzle: 1.25mm
Max: 300 Bar
Max: 80°C
1 Litre Bottle
