

Product information and Instructions

Chiefs Full Force Degreaser (Available in 20L, 200L and 1000L)

Chiefs Full Force Degreaser is a heavy-duty cleaning detergent/quick break degreaser. It is a concentrated biodegradable formula, suitable for spraying on engine bays and other heavily contaminated areas. Its solvents will solubilise greases and oils.

This product has the additional benefit of having great foaming properties producing a really thick foam that will give extra surface dwell time for a better clean.

Mixing Ratios:
Suttner ST73 Foam Lance:
100% soap on setting 5 (6.5-8%).

This product can also be used through Suttner Downstream injectors, ST160 / ST164 and the Chiefs InjectaChem:
Dousing restrictor between 1.5 - 2.0 sized restrictor (8%-13.5%).

Should you have any other brand of foam lance, based on a 1L chemical bottle, please mix between 100 – 500ml of Full Force Degreaser to 900-500ml of water. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings.

Full Force Degreaser can also be used through a pump sprayer at the following dilution ratios:

DILUTION TABLE	FULL FORCE	WATER
HEAVY DUTY DEGREASING	1	1
DEGREASING/EXHAUST RESIDUE	1	3
FLOOR WASH	1	15
GENERAL USE	1	20

Full Force Degreaser can be used with fresh or salt water.

Application Instructions:

Apply a thin layer of foam over the **dry** affected areas and allow to dwell for around 1 minute.

Using high pressure water start cleaning from the bottom to the top or backwards covering all areas. (See video in "How To" Videos.

Rinse any excess soap from the top to the bottom

This product is safe on all paints, stainless steel and chrome.

Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines **BEFORE** applying the product.

It is recommended testing all products on a small inconspicuous area before use.

Avoid letting the product dry on the vehicle, should this happen please re-foam to reactivate the soap and wash off as per the above instructions.

Avoid applying the soap on hot surfaces. This is due to the foam consisting largely of water and on contact with a hot surface, the water in the foam will evaporate leaving the product only adhered to the surface. Should this happen, re-foam to reactivate the soap and wash off as per the above instructions.

Due to Australian weather conditions, if application of the product in hot conditions cannot be avoided it is suggested to apply in sections using the above application technique.

Technical Specifications:

Product codes:

20L – 124903 – SKU-FF020L

200L – 124904 – SKU-FF0DA

1000L – 124905 – SKU-FF0PA

Colour: Purple

Foam intensity – Very Strong

pH 100 %: 13.0-13.5

Biodegradability: Expected to be readily biodegradable.

Specific gravity: 1.05-1.10

Environmental Information:

The surfactants in this product meet the criteria for biodegradability as established in Regulation (EG) n° 648/2004 concerning detergents.

Safe Handling and Storage:

The complete safety instructions of the product can be found on the material safety data sheet.

Keep the product in the original and closed packaging and protect from extreme temperatures and direct sunlight.
