

Chiefs Duo Wash (available in 20L, 200L and 1000L)

Chiefs Duo Wash has been designed to touchlessly remove heavy road grime, agricultural contaminants and red, iron oxide dirt from vehicles. This product comes in 2 Parts. Part A is a low pH product and Part B is a high pH product. These products rely on the chemical reaction of the two chemical products applied one over the other to remove all contaminants from the surfaces. If used correctly, the resultant runoff will be pH neutral.

Both products are applied to vehicles via high pressure and then rinsed via high pressure. As Duo Wash has to be applied under high pressure, the minimum requirement is an ST-164 Chemical Injection setup (two chemical injector) with accompanying lances and acid resistant gun. In addition to hardware, users of Duo Wash need to be fully trained both in washing methodology and PPE requirements.

Chemical dosage will vary and is dependent on contaminants needed to be cleaned. It can vary between 1% and 13.5%.

Duo Wash is ideal to clean prime movers without polished aluminium, trailers, taugt liners, tractors, cattle crates, civil and mining gear and rolling stock.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.

Please watch the following videos as a guide: <https://vimeo.com/482871016>

Chiefs Annihilator (available in 20L, 200L and 1000L)

Chiefs Annihilator is a non-corrosive, biodegradable product used to remove concrete, cement, hard water deposits, lime and scale build-up on all vehicles and is safe to use on virtually all surfaces.

Chiefs Annihilator is best applied through a pressure sprayer with best results achieved when applied as a foam.

For heavy contaminants such as old concrete, mix 50% Annihilator with 50% water, spray/foam on and leave for at least 15 minutes. The concrete should turn into a paste that can then be removed with agitation and high-pressure water. Please note that this process may need to be repeated dependent on the contaminant.

For less heavy contaminants, Annihilator can be mixed down to 1-part Annihilator to 3-parts water.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.

Nerta Interior Cleaner (available in 5L)

Nerta Interior Cleaner is a concentrated power cleaner for car and truck interiors.

Interior Cleaner quickly removes dirt, grease and nicotine from interior upholstery, carpets, plastic and vinyl. The product creates an anti-static environment, keeping the interior cleaner for longer. It can remove the most stubborn stains and leaves a pleasant perfume.

- highly concentrated and economical to use
- versatile and effective
- thoroughly cleans upholstery
- vanilla/apple fragrance

Can be used very effectively with the Easyclean365+ Gun for a range of interior cleaning applications.

Application - Dissolve 5-10% in a spray bottle. To clean plastic: spray the product on the surface which needs to be cleaned, then rinse with a moist sponge. With tenacious dirt: let the product soak in for a while and then wipe clean. For cloth upholstery: spray the product on the seats, then scrub shortly with a soft, moist brush. Remove the dirt with a dry, clean cloth. Remove the dirt with a dry, clean cloth.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Please watch the following videos as a guide: <https://vimeo.com/482873271>

Please ensure the use of appropriate PPE equipment when using any chemical. This should include eye/face protection and suitable gloves. Ear protection should be worn when using pressure washers or air compressors. Also, wearing the appropriate face masks or respirators when misting products or working in enclosed spaces is highly recommended. Always check the products safety data sheets before use.

Chiefs Touchless Cleaning
Chemical Range

Nerta Active Diamond (available in 5L, 25L, 200L and 1000L)

Nerta's Active Diamond is a high pH multipurpose touchless cleaner ideal for heavy duty cleaning of heavy road grime off cars, trucks, earthmoving gear, that will give between a 90% - 95% touchless clean.

Mixing ratios through a **Suttner ST73 Foam Lance**: 100% soap on setting 1 (2-2.5%).

This product can also be used through Suttner Downstream injectors, ST160 / ST164 and the **Chiefs InjectaChem**: Dosing restrictor 0.7 (1%) to 1.0 (2.5%).

Should you have any other brand foam lance, based on a 1L chemical bottle, mix between 100-200ml of Active Diamond to 900-800ml of water. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.

Please watch the following videos as a guide: <https://vimeo.com/482864069>

Nerta Anti Insect (available in 5L and 25L)

Nerta Anti Insect is an alkaline detergent specifically designed to remove dead insects from cars and trucks.

Mixing ratios through a **Suttner ST73 Foam Lance**: 100% soap on setting 3 (5.5%)

This product can also be used through Suttner Downstream injectors, ST160 / ST164 and the **Chiefs InjectaChem**: Dosing restrictor 1.3 (5%).

Should you have any other brand of foam lance, based on a 1L chemical bottle, mix around 300ml of Anti Insect to 700ml of water. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.

Nerta Carnet Jumbo (available in 5L, 25L, 200L and 1000L)

Nerta's Carnet Jumbo is a highly concentrated, alkaline touchless cleaning agent that contains no phosphates and is recommended for the touchless cleaning of cars and trucks. It has been formulated as a touchless cleaning agent to remove static dirt, salt and road grime from paintwork, and will not leave streak marks due to its wax and anti-corrosion properties.

Mixing ratios through a **Suttner ST73 Foam Lance**: 100% soap on setting 1 (2-2.5%).

This product can also be used through Suttner Downstream injectors, ST160 / ST164 and the **Chiefs InjectaChem**: Dosing restrictor 0.7 (1%) to 1.0 (2.5%).

Should you have any other brand foam lance, based on a 1L chemical bottle, mix between 100 - 200ml of **Nerta Carnet Jumbo** to 900-800ml of water. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome. **Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.**

Please watch the following videos as a guide: <https://vimeo.com/482870400>

Nerta Bio Polish (available in 5L and 25L)

Nerta Bio Polish is a concentrated gloss, drying and preservative agent, based on biodegradable cationic surfactants, basically a touchless solution to wax your vehicle.

Mixing ratios through a **Suttner ST73 Foam Lance**: 100% soap on setting 1 (2-2.5%).

This product can also be used through Suttner Downstream injectors, ST160 / ST164 and the **Chiefs InjectaChem**: Dosing restrictor 0.7 (1%)

Should you have any other brand foam lance, based on a 1L chemical bottle, mix between 50-100ml of Nerta Bio Polish to 950-900ml of water. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Chiefs Platinum Wash (available in 5L, 20L, 200L and 1000L)

Chiefs Platinum Wash is your ultimate bling truck cleaning tool. Using advanced high-pressure foam cleaning, this product is manufactured in Australia for Australian conditions and has been specifically designed to touchlessly clean polished aluminium, stainless steel and chrome truck/vehicles surfaces promising a stain and streak-free finish and is safe on all paintwork as it is caustic free, giving you that fleet wash clean.

Chiefs Platinum Wash is designed to be used on polished aluminium tanks, bull bars, roll bars, side steps and rims without streaking the aluminium. **Before using Platinum Wash on mirror polished aluminium please first test on a small inconspicuous area to ensure there is no streaking, marking or fading of the polished aluminium. Should this occur please stop using the product and call your nearest dealer as soon as possible.**

Mixing ratios through a **Suttner ST73 Foam Lance**: 100% soap on setting 1 (2-2.5%).

This product can also be used through Suttner Downstream injectors, ST160 / ST164 and the **Chiefs InjectaChem**: Dosing restrictor 0.7 (1%) to 1.0 (2.5%).

Should you have any other brand foam lance, based on a 1L chemical bottle, mix between 100-200ml of Chiefs Platinum Wash to 900-800ml of water. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Nerta Super Degreaser (available in 5L, 25L, 200L and 1000L)

Nerta's Super Degreaser is a solvent cleaner based on hydrocarbons. Dissolves oil, grease, fuel, grime and other dirt. The product will quickly penetrate and emulsify the oil and grease. Suitable for machinery, forklifts, trucks, garages, engines, chassis, motor parts, etc.

Super Degreaser is not water soluble, so mixing with water will destroy the product. It needs to be applied on a dry surface and can be used sparingly. Apply undiluted (neat) using a pressure sprayer and wet the surface, leave to dwell for approximately 2-5 minutes. Then foam over with one of the Chiefs foaming products and allow to dwell for a further 1 minute. Using high pressure water, start cleaning from the bottom to the top or backwards into the fresh soap covering all areas.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Please watch the following videos as a guide: <https://vimeo.com/482874440>

Kenotek Cargo 4100 (available in 20L) and shipped as DG

Kenotek's Cargo 4100 is probably one of the most diverse and powerful touchless cleaners available. It is more suited to remove heavy road grime, dead insects and has great degreasing properties.

Cargo 4100 has multiple uses at different ratios, please use the below as a guide through a **Suttner ST73 Foam Lance**:

- General cleaning - Setting 1 (2-2.5%)
- Dead Insects / stubborn dirt - Setting 2-3 (4-5.5%)
- Heavy duty cleaning, brake dust and degreasing - Setting 5 (6.5-8%)

This product is ideal for the following industries - Earthmoving, Agriculture, Trucking and Mining. This product can also be used through Suttner Downstream injectors, Suttner ST160 / ST164 and the **Chiefs InjectaChem** using the following restrictors:

- General cleaning - between 0.7 - 1.0 sized restrictor (1%-2.5%)
- Dead Insects / stubborn dirt - restrictor size 1.3 (5%)
- Heavy duty cleaning, degreasing - between 1.5 - 2.0 sized restrictor (8%-13.5%)

Should you have any other brand foam lance, based on a 1L chemical bottle, mix between 100 - 300ml of **Kenotek Cargo 4100** to 900-700ml of water depending on contaminants. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings.

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.

Please watch the following videos as a guide: <https://vimeo.com/482869391>

Chiefs Full Force Degreaser (available in 20L, 200L and 1000L)

Chiefs Full Force Degreaser is a heavy-duty cleaning detergent/quick break degreaser. It is a concentrated biodegradable formula, suitable for spraying on engine bays and other heavily contaminated areas. Its solvents will solubilise greases and oils. This product has the additional benefit of having great foaming properties producing a really thick foam that will give extra surface dwell time for a better clean.

Mixing ratios through a **Suttner ST73 Foam Lance**: 100% soap on setting 5 (6.5-8%).

This product can also be used through Suttner Downstream injectors, ST160 / ST164 and the **Chiefs InjectaChem**: Dosing restrictor between 1.5 - 2.0 sized restrictor (8%-13.5%).

Care should be taken if using on ceramic coating, please refer to manufacturers guidelines BEFORE applying the product. This product is safe on all paints, stainless steel, and chrome.

Should you have any other brand of foam lance, based on a 1L chemical bottle, mix between 100 - 500ml of Full Force Degreaser to 900-500ml of water. Please note that this is a guide only as it is dependent on the type of foam lance and the pressure washer's pressure and flow settings. Full Force Degreaser can also be used through a pump sprayer at the following dilution ratios:

DILUTION TABLE	FULL FORCE	WATER
HEAVY DUTY DEGREASING	1	1
DEGREASING/EXHAUST RESIDUE	1	3
FLOOR WASH	1	15
GENERAL USE	1	20

Full Force Degreaser can be used with fresh or salt water.

Do not use on mirror polished aluminium as this product may leave a white veil or streak the aluminium.
