Spray Guns

A wide range of Spray Guns are available to suit a variety of applications. With options on inlet and outlet sizes and fittings, acid resistance, low trigger force (LTF) and swivels, there are guns for every operation.

Suttner guns are built to very high specifications and have been developed over many years in the field. Most guns can be fitted with couplings and adapters to suit all lances, foam heads and high-pressure hoses.

The **LTF** system has a 90% less holding force and a 40% less trigger pulling force than the standard market wash guns.

The **swivel** option at the inlet port reduces the risk of twisted hoses and makes for easier rotation of the gun under pressure.

The well proven KW plug and coupler system for the quick connection of lances and foam lances has become an industry standard and is recommended for industrial applications.

Specialised guns for food industry and foot operated guns are also available.

Couplings

Quick connect couplings can make the business of swapping lances, foam lances and foam heads so much easier. Regardless of the gauge and thread, Chiefs have couplings, nipples and adapters to suit all brands of pressure cleaner.

From quick connect to threaded, there isn't a connection we can't make.

Lances

The choice of lances is extensive, to say the least.

From straight high-pressure lances to Twin Rollovers, Easyturns, Push Pulls and Long Casts. Lances that can deliver foam and high-pressure water from the same unit, redirect water round corners and intensify flow for heavy dirt removal.

Swivels

Swivels are a must for most wash operations. Our range includes hose swivels and hose reel swivels, in a number of sizes and configurations.
