Chiefs Platinum Plus

Soft on Polished Aluminium

5L 20L 200L 1000L

A non-caustic touchless solution for vehicles with a bit of bling. It's safe on all paintwork and will not streak polished aluminium tanks, bull bars, roll bars, side steps, or rims. Manufactured in Australia for Aussie conditions.

Nerta Carnet Jumbo

Fleet & Domestic Cleaning

5L 25L 200L 1000L

A high pH (alkaline) cleaner, ideal for the removal of road grime and contaminants from trucks, transport fleets and domestic vehicles.

Not suitable for polished aluminium

Chiefs Duo Wash

Two-Step System for Tough Stains

20L 200L 1000L

A two-part system for removal of heavy road grime, red dirt, and long-term staining. The chemical reaction between a high pH product layered over a low pH component lifts staining, making it the go-to option for renovation cleans and mining vehicles.

Nerta Anti-Insect

Removes the Bug & the Residue

5L 25L

Anti-Insect is a high pH (alkaline) detergent specifically developed to remove dead insects and insect residue from vehicle bodywork and windscreens.

Chiefs Extreme Wash

Toughest Single Soap

5L 20L 200L 1000L

Our most powerful single soap with degreasing properties. Perfect for removal of heavy road grime and insects. Safe on chrome and undamaged paintwork—old chalky paint may be further damaged by Extreme.

Why Touchless Cleaning?

Touchless cleaning saves you time, effort and money.

When you use a concentrated, effective foam-on soap, a little goes a long way. If you pair our touchless soaps with a Suttner foaming lance or downstream injector, there's no need to mess around with dilutions. Cleaning and maintaining your vehicles and equipment is chore enough, Chiefs aims to make it as easy and painless as possible.

Our dense foam breaks the static bond between the grime and the surface. It's designed for touchless cleaning, so there's no need for manual scrubbing or brooming—just let it do its thing for a minute or two and then blast it away with high-pressure water.

The risk of swirls or scratches is eliminated, and the amount of time and hard work that goes into cleaning is dramatically cut.

Our range of soaps, specialist cleaners and hardware can be adapted to suit any industry—trucking, agriculture, mining, earthmoving, construction, transportation, and domestic. It doesn't matter what you're cleaning, or what contaminant you need to remove, Chiefs has a solution to get it done.

Touchless Foam – Fast. Easy. Clean.

Touchless Cleaning Technique

Using a touchless technique is all about letting the soap do the work and then lifting it away from the surface with high-pressure water.

Traditional, manual cleaning requires that you soap up the vehicle, scrub or broom it, and then rinse off the soap. With touchless cleaning, you soap up the vehicle, power wash, and then rinse.

Power washing involves blasting high-pressure water into the fresh soap. The soap breaks the static bonds between the grime and the vehicle's surface; power washing is required to lift the whole lot off and wash it away. This can only happen if the soap is allowed to do its thing—and not instantly rinsed onto the ground by beginning from the top.

For this reason, we begin power washing from the bottom and move upward. On large panels and trucks it is easier to work in vertical sweeps and move backward along the vehicle. The key is to avoid rinsing off the soap until you're ready to blast it. A final rinse from the top, downward, will remove any residual soap.

Please ensure the use of appropriate PPE when using any chemical. This should include eye/face protection and suitable gloves. Ear protection should be worn when using pressure washers or air compressors. Also, wearing the appropriate face mask or respirator when misting products or working in enclosed spaces is recommended. Always check the product's safety data sheet before use.
